

Successful factory opening - a milestone for the future!

It was with great pleasure and pride that we celebrated the opening of our third factory in Talbenden/Düren.

Focus of the day was the presentation of our new aluminium printing machine – a real game changer for our production capabilities and a strong sign of innovation ‘Made in Düren’.

We were particularly pleased to welcome numerous political and business leaders from the community, who had the opportunity to see by themselves the performance of our products.

With the new plant, we are making a conscious commitment to Düren as a location – not only out of entrepreneurial conviction, but also out of a sense of responsibility: over 250 employees and their families are standing behind our success. This facility offers them long-term prospects and will allow us to grow further with them.

This is only the beginning: We are focusing on growth – further expansion steps are already planned to further strengthen our position in the market.

A big thank you to everyone who made this day possible. Bring on the future – we are ready!
